

REAL TEAK WOOD. NO FOAM.

Bring the warmth and character of real teak to your next build or refit. Made locally on the Gold Coast, Teaken combines teak with a resin composite to create thin, lightweight, strong and flexible trim and cosmetic panels.

1.8 mm

THIN, LIGHTWEIGHT AND FLEXIBLE

A slim profile for custom surface details and retrofit projects. Australian made and certified, with a patent-pending product design.

Peel and stick

INDUSTRIAL-GRADE 3M BACKING

High and low surface energy adhesive options help match the backing to your substrate and its coating. Quick, straightforward application on suitable prepared surfaces.

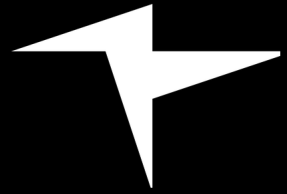

Custom cutting and engraving

Panels, sheets and trim can be custom laser cut to size and engraved with logos, names, patterns or design details.

Add a luxury finish to dashes, helms, drawers, cupboard fronts, tabletops, walls, floors, ceilings and other suitable surfaces in vessels, vehicles, interiors and refits.

Made for your project

Custom teak details for vessels, vehicles, builds and refits

Vessel tabletop

Pull-out kitchen bench

Engraved fold-down table

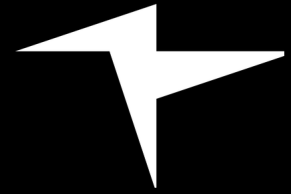

Vehicle door trim

Tailored shapes, fine engraving and natural teak grain bring a distinctive finish to each project.

Six hardwood options

Natural grain, from light gold to dark tones

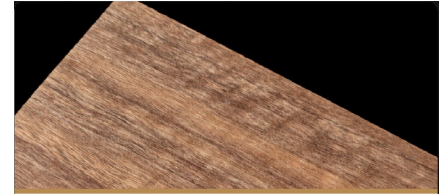

TEAK

Warm golden tones

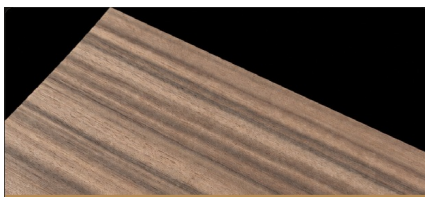

SMOKED OAK

Rich, dark oak grain

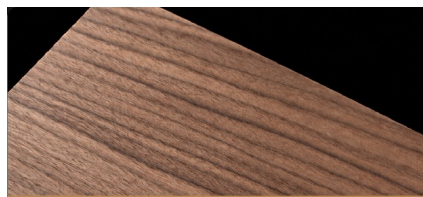

SPOTTED GUM

Varied Australian grain

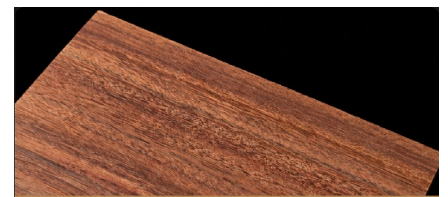

QLD WALNUT

Deep natural character

AMERICAN WALNUT

Flowing walnut grain

IRONBARK

Dense, distinctive hardwood

Custom finishes and applications

Choose the grain and shade to suit your design. Smoked Oak offers a rich, dark look for kitchens, benches, tables and trim, including exterior projects with a suitable protective finish.

Teak finish options include exterior teak sealer, hard-wax oil and satin polyurethane varnish. Raw teak can also be supplied for a suitable project-applied finish. Select the timber, coating and adhesive for the intended location.

3M adhesive matched to the surface

Industrial-grade peel-and-stick backing is available for high and low surface energy materials. Confirm the substrate and coating when ordering so we can select the appropriate option. Prepare, clean and dry the surface, check the fit, then peel and press firmly into place following Teaken application instructions.

TEAK MATERIAL

AUD \$330 / m²

Sealer and adhesive applied

Plus file build time, machine time and processing.
Custom project pricing supplied on enquiry.
